

## Summary for Cases (Defects)

---

Project: Inferno Predictor: Wildfire Prediction System

By Nimay Patel, 5/7/2022 9:44 AM

---

## Test Runs

---

No test runs found with defects.

# Comparison & Summary

## Component testing (5)

ID	Title	Latest & Combined
C2378	<a href="#">HomePage</a>	
C2379	<a href="#">Predict page</a>	
C2380	<a href="#">User data privacy</a>	
C2388	<a href="#">Map interaction</a>	
C2389	<a href="#">Dynamic Default values depending on location</a>	

## Module Integration and Flexibility (5)

ID	Title	Latest & Combined
C2381	<a href="#">Connectivity among web pages</a>	
C2382	<a href="#">Test calls to OpenWeatherMap API</a>	
C2386	<a href="#">FireBehaviorIndices API</a>	
C2387	<a href="#">Multi platform accessibility</a>	
C2390	<a href="#">Application performance under different map types</a>	

## Edge Case testing (3)

ID	Title	Latest & Combined
----	-------	-------------------

C2383	Running prediction on blank coordinate text boxes and no selections on map
C2384	Running prediction on invalid coordinates (out of range, coordinates on water bodies)
C2385	Clicking refresh multiple times
